

**The CAMAT Program is not accepting new clients at this time. We plan to begin accepting new clients again in mid-August 2025.**

**We understand there is a high need for behavioral health services and you may need to explore additional options for your children. We have identified several reputable behavioral health providers in our community who may be accepting new clients or offer shorter wait times. These providers specialize in a range of therapeutic services, including counseling, psychotherapy, family therapy, and mental health assessments.**

-

## Intensive Mental Health Services

*For families looking for a more intensive types of therapy (e.g. more than once weekly). More intensive therapy programs are often needed when children are more severely limited by their symptoms (e.g. unable to go to school, unable to take care of themselves, most of the day is spent engaging in avoidance or compulsive behaviors).*

*Intensive Outpatient Therapy (IOP) is a structured, non-residential treatment program that typically offers multiple therapy sessions per week (3-5). This is a step up from traditional therapy, but without the need for 24-hour supervision.*

*Partial Hospitalization Programs (PHP) or “day programs” offer structured therapy sessions typically for multiple hours a day multiple days per week. This is a step up from traditional therapy and IOP, but still allows clients to live at home and maintain independence.*

### Rogers Behavioral Health

**Website:** <https://rogersbh.org/locations/miami-fl>
